Experience

•SurveySparrow ***July 2025 - Present***

Product Developer Chennai, Tamil Nadu

- Owned **end-to-end development** of a scalable nominations system, including **database schema architecture** designed for future scalability and feature expansion, enabling **organization-wide voting**.
- Re-designed participant selection using **DB-driven filtering** (departments, groups, custom properties, etc.) in **PostgreSQL**, **reducing OpenSearch dependency and infrastructure cost**.
- Built **custom, context-aware participant filters** to ensure dropdown options reference **only eligible/selected users**, improving UX and query efficiency.
- Optimized performance by introducing **targeted database indexes** for high-traffic queries. Integrated **OpenSearch** for low-latency full-text search where required.
- Built **state-driven scheduling workflows using Time Relic** to reliably trigger emails, in-app notifications, and actionables.Implemented **background processing and caching using BullMQ + Redis**, improving throughput, reliability, and reducing database load.
- Delivered a **high-performance frontend** using **React + React Query** with reusable components via **Twiggs**.Leveraged **AI-assisted development** to do repetitive tasks and accelerate implementation, delivering an estimated **3 months of planned work in 1.5 months** without compromising quality.

•Rogue Pixxel It Solutions LLP ***August 2024 - July,2025***

Full Stack Developer Ranchi, Jharkhand

- Architected and delivered a comprehensive ERP solution for one of India's top organization, featuring a responsive, high-performance frontend built with **Next.js**. and a scalable **Nest.js** backend implemented using **TypeScript and SOLID principles**.
- Designed and deployed a **PostgreSQL** database schema from scratch. Implemented robust **authentication** using **JWT** and **role-based access control (RBAC)** for multiple user roles, ensuring secure and tailored access across the ERP system.
- Built reusable components following best practices to enable an efficient, scalable, and maintainable frontend, and utilized **Redux** and **Zustand** for state management to enhance application performance and scalability.
- Developed and deployed an **SEO-optimized**, visually engaging, responsive frontend for Jharkhand's leading real estate company using **Next.js**, with an **Express.js** and **Node.js** backend, and enhanced user experience with dynamic animations using **Framer**.

•G7CR Technologies-A Noventiq Company ***May 2023 - March 2024***

Cloud Engineer Bengaluru, Karnataka

- Led the complete migration initiative for several mid-sized enterprises, thorough assessments of their existing infrastructure to pinpoint areas for improvement. Produced meticulously detailed migration reports, which offered crucial insights and actionable strategies for optimization, resulting in the **optimization of client workloads**.
- Crafted a tailored roadmap for Azure Cloud transition, ensuring a seamless journey by overseeing each step with precision. Throughout this transformative process, dedicated efforts were directed at **enhancing workload efficiency** through innovative solutions.
- **Automated Disaster Recovery** for a leading **Fortune 500 corporation** , architecting and deploying sophisticated PowerShell automation scripts.Which resulted in a **significant reduction in downtime**, enhancing operation and preserving critical business functions even during challenging scenarios.
- Developed a **React.js** powered, employee performance dashboard for an **SMB** , enabling real-time insights and streamlined evaluations.

Technical Skills

Languages: JavaScript, Java, Typescript, HTML, CSS, Tailwind CSS
Frameworks: React Js, Next Js, Node Js, Redux, Zustand, Nest Js, Express Js , Redis , Open Search,Bull MQ, Time Relic
Developer Tools: VS Code, Jira, Github, LightHouse, React Dev Tools
Cloud/Dev-Ops: Linux, Azure, Docker
Others: Data Structure and Algorithm, PostgreSQL, MongoDB, REST API, Framer, Swagger, Postman, Insomnia, Agile, Scrum, Confluence
Soft Skills: Problem Solving, Self Learning, Presentation, Adaptability

Personal Projects

– **Trendy Cart**

E-commerce platform for users with features like login/signup using JWT Auth and sections for popular products.

∗ Technology Used : **MongoDB,Express.js,React.js,Node.js**

– **My Resume Website**

A web application that shows my profile, projects, certification,achievements.

∗ Technology Used: **HTML,CSS,JavaScript**

– **Furniture Premium**

A highly responsive Landing page for E-commerce website, hosted using vercel.

∗ Technology Used: **HTML,Tailwind CSS**

– **Spotify(Clone)App**

A web application, which is a clone of Spotify having a list of some favourite songs.

∗ Technology Used : **HTML,CSS,JavaScript**

Certificates And Achievements

ReactJS: Certified React.js Developer - March 2025
Ranked 278/845: Weekly Coding Contest -131 at Coding Ninjas
Microsoft Certified: Azure Administrator Associate - AZ-104 - March 2024
Microsoft Certified: Azure Fundamentals - AZ-900 - December 2023
LEETCODE: 50 Days Badge 2023
JSPIDERS: Professional Training in Core Java, J2EE, SQL, WEB Technology - July 2023

Education

–**Kalinga Institute of Industrial Technology (KIIT)** ***July 2018 - June 2022***

Bachelor of Technology in Electronics & Telecommunication Engineering **Bhubaneswar,Odisha**
